Macrolux **NEW GEN**
MULTIWALL POLYCARBONATE

More Light Better Insulation and a Superior Warranty

NEWGEN 8MM 4-Wall { Improved Light for Higher Productivity } **Improved Earnings!**
{ Improved Insulation for Lower Heating Cost }

Compare the standard twin-wall on the above photo, left, to the NEWGEN 8mm 4-Wall on the right.

Do you see a difference? In comparing the NEWGEN 8 mm 4-Wall with standard 8 mm twin-wall, the 4-Wall provides 12% more thermal insulation yet there is little difference

in light transmission today, and less than three years later, NEWGEN light transmission EXCEEDS standard twin-wall. Call CO-EX today for the facts!

NEWGEN - A greenhouse covering that exceeds your expectations!

Enlightened Design Precision Engineering

Introducing Macrolux® NEWGEN 8 MM - 4-WALL — 15 YEAR WARRANTY

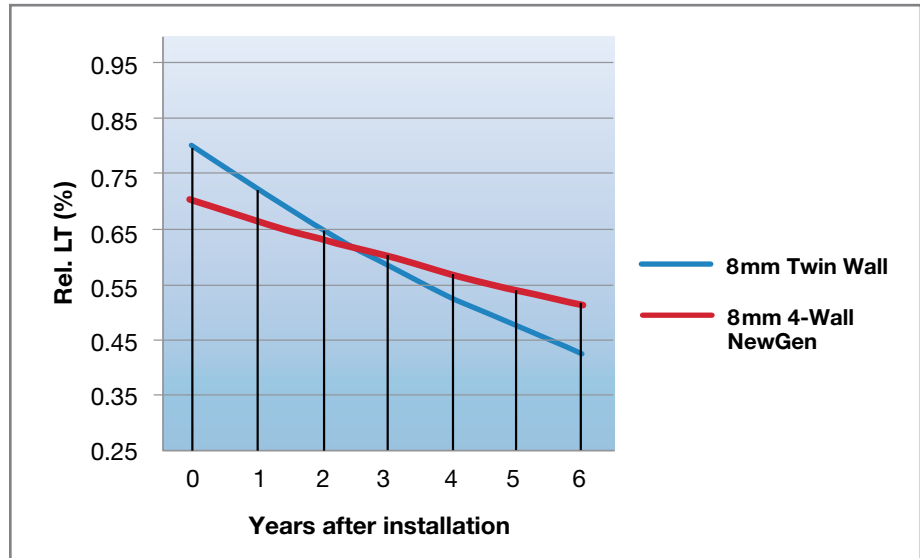

Improved light transmission and thermal insulation

CO-EX's new 8mm 4-Wall Series now comes with the NewGen 15 year warranty. This means improved light transmission over time (less light transmission degrading) compared to the standard 8mm products available from CO-EX or currently on the market.

Published light transmission data tells you only half of the story regarding the performance of your greenhouse, since it refers to the light transmission at the time of installation. Light transmission for polycarbonate sheets degrades over time. The NewGen products reduce the light transmission over time with less than 50% compared with the standard product.

While having an initial light transmission of only 10% less compared to the 8mm twin wall, over time however, due to the NewGen co-extrusion, the actual light transmission of the 4-Wall

product will be comparable and then exceeds the light transmission of a standard 8mm twin wall product in less than 3 years after installation.

In comparing the 8mm 4-Wall NewGen with the 8mm triple or twin wall, the 4-Wall provides 12% more thermal insulation. In fact, the thermal insulation of the 8mm 4-Wall exceeds that of the 10mm twin wall. This added insulation results in lower greenhouse heating costs.

Product	Initial Light Transmission (ASTM D-1003)	Thermal Insulation U value	Thermal Insulation R value
2 wall 8 mm clear	80%	0.56	1.79
3 wall 8 mm clear	75%	0.53	1.89
4 wall 8 mm clear	70%	0.49	2.04

The 4-Wall NewGen product comes standard with the anti-condensation forming Min-Dew treatment. The 15 year warranty provides an improved light transmission and hail resistance over time and a better thermal insulation compared to any 8mm product currently offered in the market. The 8mm 4-Wall NewGen is available in crystal clear and clear-orange peel texture. The latter provides a fine light diffusion, without compromising the light transmission.

The 8mm 4-Wall product is currently available from our East and West Coast warehouse. Depending on demand, it will also be distributed from the Ontario warehouse in Canada.

8mm - 4-Wall – NewGen: A greenhouse cover that exceeds your expectations!
