

SHADE-LITE® Four Wall material offers four layers of protection for greater energy savings!

SHADE-LITE® offers unique characteristics which make it ideal as a replacement for traditional glass. It is perfect for applications requiring panels which provide thermal insulation, are light in weight yet strong, offer high shock resistance, flame resistance, great economy, vandal resistance and design flexibility. Ideal for use in greenhouse applications, SHADE-LITE® helps to provide an exceptional growing environment.

LIGHT TRANSMISSION – The unique design of SHADE-LITE® offers visual light transmission of 60%.

ENERGY EFFICIENT– SHADE-LITE® offers 30% additional savings over the conventional 2 wall material and 10% over the 3 wall panel.

SUPERIOR STRENGTH – SHADE-LITE® offers superior strength against breakage. Able to withstand extreme abuse, the strong SHADE-LITE® polycarbonate panel has an impact strength 200 times greater than glass and 10 times greater than acrylic.

COLOR PANELS – SHADE-LITE® panels are attractive with excellent visual quality.

EASY TO INSTALL – SHADE-LITE® polycarbonate panel has been specifically designed for simple and rapid installation. It won't crack or split when cut or drilled.

LOW FLAMMABILITY – SHADE-LITE® panels are classified as self-extinguishing. Compared with other plastic products used in the building industry, they have an exceptional fire performance.

UV COATING – SHADE-LITE® panels are manufactured with a superior UV coating to protect plants and young seedlings. There will be no mix up in installing these panels. Our UV coating is readily apparent so installers can easily tell which side faces the sun.

LOW HEAT – SHADE-LITE® Four Wall material offers four layers of protection for greater energy savings. Rated up to CC1 and Class 1.

WARRANTY – 10 year
