Macrolux[®] MACRO-PRINTING

FOR PRINTING

Introducing Multiwall polycarbonate sheet in white color specific for screen printing.

MACRO-PRINTING is a new sheet specially designed in our laboratories to respond to new technologies of printing and screen printing; the sheet fully respects all the characteristics of multiwall polycarbonate sheets.

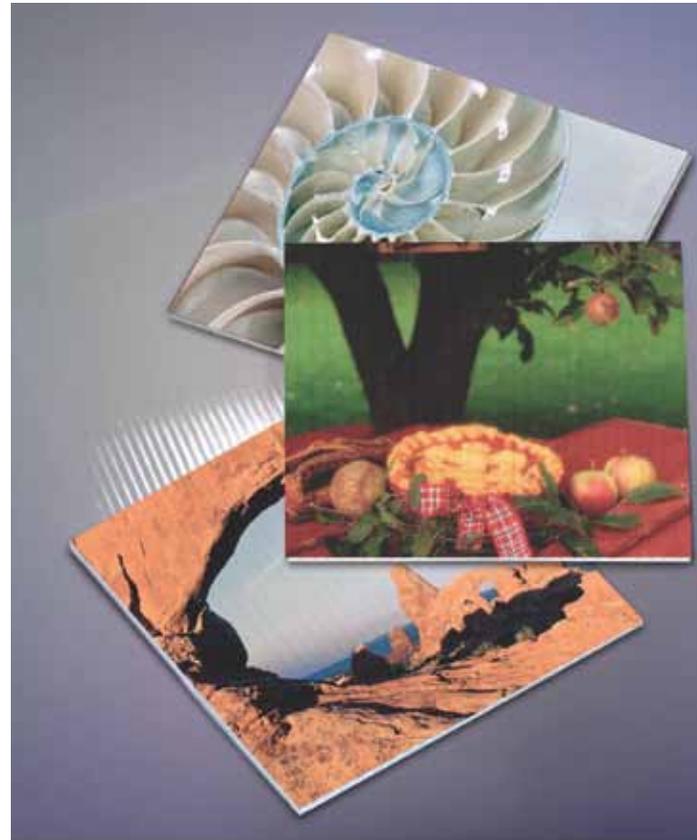

Main properties of this new sheet:

- Lightness
- Easy to handle
- Plain surface
- Good mechanical and impact resistance
- Resistance to chemicals and humidity
- Easy to work (cutting, drilling, etc.)
- Available in big sizes
- UV resistant
- Possibility of inside and outside application
- Excellent fire performance

Applications:

- Printing: printable on both sides
- Advertising: billboards, advertising boxes, exhibitors etc.
- Outside and inside colored walls: stands, shops, etc.
- Display: visual communication in large formats

	Code	Thickness	Sizes*	Color
Sheet UV protected in co-extrusion	MT91	4 mm	82.6" x 236"	White (9011)

* Available up to 39' upon request.

Available in non UV protected.

All the sheets are covered with PE protection foil in order to preserve the surfaces clean and to avoid scratches to the print processing.

Swiss made quality
polycarbonate panels.
